

Close-up of the corn picker showing how
the stalk goes into the rollers and how the ear
is sheared from the stalk. This was taken on
the experimental farm near Ames, Iowa.

for legend see duplication

Close-up of new automatic
corn picker developed by
engineers of the U.S. De-
partment of Agriculture
at the Ames, Iowa field
station. Note how the
stalk goes into the rollers
and how the ear is sheared
from the stalk.

N-127 KILLIAN Nov. 1939
